

Jane Goodall Instituut Nederland

The Jane Goodall Institute strives for the sustainable protection of chimpanzees and their habitats.

The goal of the Jane Goodall Institute (JGI) is to take action worldwide. Across the globe, the JGI inspires young and old to make a difference, for the protection and preservation of nature on our planet.

There are a variety of JGI projects in Africa, focused on the protection of chimpanzees in the wild, the protection and preservation of nature reserves and sanctuaries for rescued (baby) chimpanzees.

In all our nature protection programmes, the connection between people, animals and nature plays a central role. The JGI strives for a healthy ecosystem in which people, animals and the environment exist in sustainable harmony.

It is not only chimpanzees that benefit from our projects, but also the other living beings in the same nature reserves. We cannot protect the chimpanzees and their habitats if we do not take account of the human beings that also live there. Our projects are always in partnership with the local population through, for example, public information events and education for local communities around nature protection, and projects for sustainable agriculture.

The Jane Goodall Institute Nederland is part of a global network and makes the difference by supporting nature protection programmes in Africa and by running informative and awareness-raising campaigns in the Netherlands.

By giving financial support to projects in Africa, the Jane Goodall Institute Nederland contributes to the sustainable protection of chimpanzees and their habitats.

The global Roots & Shoots programme, active in 120 countries, is also active in the Netherlands. Roots & Shoots inspires youngsters from pre-school to university to take action for a better living environment. It brings together young people to work with their peers for a better world for people, animals and the environment.

You can make the difference! Start right now and support the Jane Goodall Institute in whatever way you can.
